

Professional Experience

Freelance Web Development

2021 – present

As a freelance web developer, I have gained valuable experience working independently on a variety of projects. Throughout my career, I have had the opportunity to collaborate with a range of clients that have allowed me to develop solid skills in web design and development.

I am now looking to take a step forward in my career and add knowledge to my experience. My goal is to transition into a position working for a reputable company where I can work as part of a team and collaborate on larger, more challenging projects.

I focus on staying on top of the latest trends and technologies in the web development field, and I am willing to acquire new skills to complement my current experience.

I know that working at an established company will provide me with the opportunity to learn, participate in exciting projects, and play an integral role in the company's success.

Education

Escuela Normal Superior Sofia B. de Spangenberg

2023 | Capital Federal, Argentina

I attended the prestigious Institution of Modern Languages - Sofia Esther Broquen de Spangenberg, where I had the privilege to fully immerse myself in learning English and Italian. Thanks to this exceptional educational institution, I have acquired an extensive command of both languages, which allows me to establish effective communication with clients. This linguistic versatility not only enhances my ability to interact with international clients, but also provides me with the necessary skills to function in a globalized work environment. Furthermore, I am convinced that this solid foundation in languages will be an invaluable asset to further my professional growth and open me up to exciting opportunities in the future.
